# The House on the Cover....

**No. 5754**—A beauty in brick. A spacious home planned for a large and active family. The all purpose room features two complete window walls and can be entered from either the living room or terrace for a combination of indoor and outdoor activities. Dotted lines in hall indicate location of disappearing attic stairs for additional storage in the attic.

**ORDER YOUR PLANS THIS SIMPLE, EASY WAY!**

**USE THE HANDY ORDER BLANK ATTACHED!** Or just send us your name and address with the plan number from the book and the number of sets you want along with your remittance and we'll have them in the mail within 24 hours after receipt of your order. Garlinghouse plans are complete and the house can be constructed from only one set of plans. However, in most cases, it is wise to include three or four extra sets in your order—one for the builder, a set for your city building department, a set or two for financing, if a loan is required, and of course, you will want a set for yourself to check on the construction as it progresses. Here's what you get:

**PLANS**—The complete working plans consist of blue prints of all four elevations, basement and all floor plans and details showing built-in features and intricate parts, all drawn to a scale of not less than one-four inch to one foot. Also, a plot plan in blank to be filled in locally.

**SPECIFICATIONS**—The specifications list in detail

the construction of the house from the excavation to the interior decoration.

**LUMBER AND MILL LISTS**—The lumber and mill lists consist of an itemized list of lumber and mill materials needed to construct the building and state where each item should be used.

Garlinghouse Company, Inc., Topeka, Kansas. Plans for every design in this book and all the books listed on the back cover are available for prompt shipment on receipt of order.

No. 5682—Simplicity in planning is the keynote of this design. The rooms have been arranged in a conventional manner for the ease of one floor living. Even though the plan shows a basement, a utility room has been provided for laundry equipment eliminating stair climbing on wash days. Construction is frame with brick veneer for exterior.

**No. 2618**—This brick veneered cottage is exceptionally neat and attractive. The shutters, front entrance and porthole window add to its charm and beauty. The very convenient and economical floor plan shows a lovely living room with book nook, a large kitchen with dining space and well equipped cupboards, two bedrooms, bath and closets. A large attic is reached by the stairs from the hall, and the stairs from the kitchen lead to a full basement.

**No. 5546**—This three bedroom plan has been designed so that the front bedroom may also be used as a den or an office. With the convenient entrance direct from the entrance hall and with the half bath, it would make an ideal studio or office. Brick veneer with siding in the front gable is shown for exterior walls. Plans show a full basement.

*In purchasing your construction plans from The L. F. Garlinghouse Co., Inc. you are dealing with America's pioneer plan service—one that has had 40 years of experience in designing homes which are lived in and enjoyed by more than 1,000,000 persons.*

**No. 5804**—There is no crowding evident in this large, three bedroom home. The rooms are spacious and provide the utmost for convenient and gracious living. The large living room offers many possibilities for furniture arrangements and will be ideal for entertaining. The modern housewife will heartily approve the efficient kitchen.

**No. 6276**—Four bedrooms on one floor have been provided in this brick-veneered, basementless house. All bedrooms have large closets and in addition there is a walk-in general-purpose storage room off the kitchen. The triangular planting box under the living room window and the decorative iron work for the entrance add much to the appearance. The roof is sheet copper.

**No. 5836**—Here is another version of a very popular plan. The outstanding room being the all purpose room. This room could be used for a den, bedroom, study or activity room. The house is almost rectangular in shape for economy in construction.

**No. 6187**—In simplicity there is beauty, as shown by this symmetrically-designed brick-veneer bungalow, framed by attractive planting boxes. Bed-rooms and closets are larger than found in most five-room houses, and the bath is compartmented so that it may be occupied by more than one person. Access to the full basement is particularly convenient, since there are doors both from the kitchen and the garage. Windows are all of the wooden, double-hung type.

**No. 5732**—A beautiful home in a beautiful setting. The sleeping quarters are located across the back of the house completely separate from the living and working areas. Many housewives prefer the kitchen and nook located as shown since most activity takes place at the front of the house and a considerable part of the day is spent in the kitchen. If the width of your lot permits, a breezeway and garage could be placed alongside the house with entrance at the side door.

**MINOR ALTERATIONS CAN BE MADE BY BUILDERS**—It is impractical to change our tracings to show alterations, but minor alterations in design, material substitutions, etc., can be made by any competent builder without going to the expense of making special plans, which usually cost several times the price of our stock plans.

**No. 6283**—Its simplicity of lines assures moderate initial cost for this house and its brick construction means low maintenance over the years. Ample dining space is provided in the large combined living and dining space. Heating and laundry facilities are placed in the well-located utility room. Because there is no basement additional storage space is made possible by the shelf-lined room opposite the bath. The entire bed room section can be closed off by the single door into the hall.

To the visitor approaching a home for the first time, the entrance, the front lawn, the walk, the driveway, and the landscaping contribute greatly to the first impression. He then sees a beautifully designed doorway, inviting him to enter. Through the open door he glimpses shining floors, harmonious colors and tastefully furnished rooms. He is drawn on into the house, to its comfortable furniture, its carefully thought-out appointments. On every side he sees the personality of the occupants reflected in the vital and livable rooms. He thinks to himself, "This is a HOME."

**No. 5784**—If you wish to take advantage of a view at the back of the house and still maintain a living room at the front of the house, this combination living-dining area will be the answer. Exterior walls are of frame, brick veneered.

*The most satisfactory way of obtaining an accurate estimate of the cost of the house that you intend to build is to purchase a set of plans and have your material dealer or contractor figure directly from those plans. Then there is no error, which is often the case if approximations are made on a square-foot or cubic-foot basis.*

**No. 3671**—Simplicity and beauty are exemplified in this cottage of five splendid rooms. The living room is exceptionally attractive with its massive picture window and end fireplace. Construction is brick veneer over frame with stone across the front of the bedroom wing.

*There is one thing which should be remembered when selecting a plan for your new house. Although you are choosing a home to suit your own needs, it is wise to consider resale possibilities in case you wish to dispose of your property at some future date. In this respect a simple, attractive house, built with care and attention is your best investment in service, satisfaction, and salability.*

**No. 6215**—Careful planning is evident throughout this simple, but attractive, design. The house is skillfully divided into three areas of use which are well separated: namely, the kitchen-dining room section, the living room-den, and the bedroom area. The terrace would be handy as an outdoor dining room since it is reached directly both from the kitchen and the dining room. Each of the bedrooms has a double closet running the length of the room. The bath is especially nice, being divided into two sections, with a built-in dressing bench and a dressing vanity. Wood storage for the fireplace is provided in the compartment in the mantel. Construction is brick-veneer. The roof is of composition shingles.

The "reverse" of a plan means that the rooms which are shown on the left in the photo and floor diagram would be placed on the right. All dimensions and proportions are retained in the plan as reversed. To obtain the effect of a reversed plan hold the photo to a strong light and look through the rear side. Reverses are provided to allow you to orient the house to suit your lot.

**No. 5746**—Brick and stone have been used to good advantage to bring out the beauty of this home. The plan shows an efficient floor plan with excellent window treatment. Note the numerous closets which assure ample storage space. The kitchen is efficiently arranged and large enough to accommodate a breakfast table without crowding.

*The most satisfactory way of obtaining an accurate estimate of the cost of the house that you intend to build is to purchase a set of plans and have your material dealer or contractor figure directly from those plans. Then there is no error, which is often the case if approximations are made on a square-foot or cubic foot basis.*

**No. 2287**—This delightful brick-veneered cottage is very popular in all sections of the country. The plan shows four lovely rooms, bath, and closets with five-room efficiency achieved by the ample dining space in the kitchen. Separated by a serving bar from the food preparation area of the kitchen, the dinette is well lighted and conveniently arranged.

No. 6075—This spacious house, constructed of brick veneer, derives its imposing appearance from the massive chimney and the extremely large windows. If the family required a third bedroom the den could be closed from the vestibule and would serve that purpose excellently since it has a closet and is just across the hall from the bath. The casement window for the front bedroom is V-shaped to assure ideal ventilation. The kitchen contains space for the housewife's "office" to be used in planning menus and in organizing household routine.

**No. 5703**—This plan was designed to fill many requests for a home with the living room being exposed on three sides. In addition to meeting this requirement the plan shows an excellent arrangement for the other rooms. The hall permits easy circulation between rooms and direct entrance from the vestibule. Roman brick with a combination of siding is used for the exterior walls.

*To the visitor approaching a home for the first time, the entrance, the front lawn, the walk, the driveway, and the landscaping contribute greatly to the first impression. He then sees a beautifully designed doorway, inviting him to enter. Through the open door he glimpses shining floors, harmonious colors and tastefully furnished rooms. He is drawn on into the house, to its comfortable furniture, its carefully thought-out appointments. On every side he sees the personality of the occupants reflected in the lovely and livable rooms. He thinks to himself, "This is a HOME."*

## Minor Alterations Can Be Handled By Any Competent Builder . . .

Residence plans presented in this book are stock plans covering the construction of homes shown by photos and floor plan diagrams.

While it is impractical for us to change our tracings to show alterations, minor changes in design and material substitutions can be handled by any competent builder who is familiar with various types of construction, without going to the expense of making up special plans or supplements.

Let's assume, for example, that plans on the home you want to build, specify frame construction instead of brick veneer, for exterior walls. A brick veneer wall is made by applying one course of brick to the outside of a frame wall, instead of wood siding. The foundation walls are the same thickness, but since the brick is on the outside of the frame the foundation should be set out the thickness of the brick, all around, in order to provide a base for the veneer.

Perhaps you would like to add an extra window to the living room, dormer, to an upstairs room, or move the partition between the kitchen and dining room to increase the size of the kitchen. Such changes are simple to handle, and may be added to the stock plans by the builder, using a colored pencil, and will serve as a guide to the carpenters on the job.

Filling in blank spaces in the SPECIFICATION AND CONTRACT FORM which accompanies each set of plans, will serve as a written confirmation of all verbal understandings, notations on plans required to meet local ordinances, minor alterations, etc., between owner and builder, and will form the legal basis upon which their relationship is established.
